

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of claims:

1-15. (Canceled)

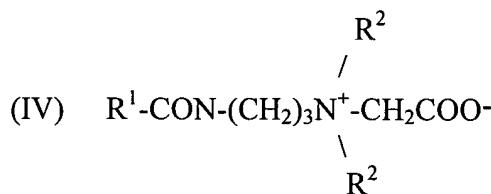

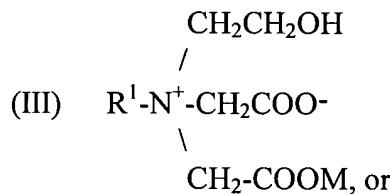

16. (Currently amended) An aqueous phytopathological formulation comprising:
a hydrosoluble salt of at least one aminophosphate or aminophosphonate class type herbicide;
at least one principal surfactant selected from alkylbetaines and alkyl(amidoalkyl)betaines; and
at least one additive (iv) being an alkylmonoglycoside or alkylpolyglycoside selected from the group consisting of:

- (i) ~~amines or etheramines comprising at least one hydrocarbon radical containing 2 to 24 carbon atoms, optionally polyalkoxylated;~~
- (ii) ~~acid or non acid phosphate mono or di esters, optionally polyalkoxylated;~~
- (iii) ~~alkali metal, alkaline earth metal, ammonium, alkylammonium, alkanolammonium, iron, zinc or manganese salts of a mineral acid, and~~
- (iv) ~~alkylmonoglycosides or alkylpolyglycosides.~~

17. (Previously presented) The formulation according to claim 16, wherein the herbicide is a hydrosoluble salt of N-phosphonomethyl glycine.

18. (Previously presented) The formulation according to claim 16, wherein the herbicide presents a content of between 80 and 510 g/l, expressed in acid herbicide equivalents.

19. (Currently amended) The formulation according to claim 16, wherein the principal surfactant corresponds to one or more of the following formulae:

wherein:

R^1 represents a linear or branched alkyl group containing 3 to 30 carbon atoms;

or an alkamide group;

R^2 , which are identical or different, represent an alkyl radical; and

R^3 represents a hydrogen atom or a $-CH_2COOM$ radical or an alkyl radical;

and

M represents an alkali metal, optionally sodium.

20. (Previously presented) The formulation according to claim 16, wherein the principal surfactant is present in an amount of between 20 and 180 g/l.

21-26. (Cancelled)

27. (Currently amended) The formulation according to claim 16, wherein ~~compound the additive~~ (iv) is octylglycoside, an octylpolyclycoside, decylglycoside, a decylpolyglycoside, or a mixture thereof.

28. (Currently amended) The formulation according to one claim 16, wherein the ~~compound additive~~ (iv), is present in an amount of between 0 and 150 g/l.

29. (Currently amended) The formulation according to claim 16, wherein the principal surfactant and the additives ~~(i) to (iv)~~ has a proportion by weight of principal surfactant/sum of additives (i) to (iv) of between 6/1 to 1/2.

30. (Currently amended) The formulation according to claim 16, wherein the principal surfactant and the additive(s) (iv) represent a total amount of 60 to 180 g/l of the formulation.

31. (New) An aqueous phytopathological formulation comprising:

a hydrosoluble herbicide salt of

alkali metals, secondary or primary amines, diamines, alkanolamines, or sulphoniums, with

N-phosphonomethyl glycine

at least one principal surfactant selected from alkylbetaines and alkyl(amidoalkyl)betaines; and

at least one additive (iv) being an alkylmonoglycoside or alkylpolyglycoside.
